

ReadySaltedCode Relaunch Strategy

Discussion Document - January 2026

Purpose: Help Genevieve decide on products, services, positioning, and language for the ReadySaltedCode relaunch.

Key Question: How does ReadySaltedCode make money while positioning Genevieve as a senior industry figure rather than a classroom practitioner?

1. The Positioning Shift

Current Positioning (to change)

"Dr. Genevieve Smith-Nunes, with over 15 years of experience teaching in schools and universities, brings academic rigour to practical classroom resources."

Problem: This positions her as "experienced teacher" - someone you hire to run a workshop with your Year 7s.

Proposed Positioning

"Dr. Genevieve Smith-Nunes has shaped computing education at the highest levels - from contributing to the UK's national computing curriculum to developing ICT education policy for Caribbean governments. ReadySaltedCode brings this expertise to educators through research-backed resources and methodologies."

Shift: From "I'll teach your students" to "I'll empower you to teach your students better"

2. Credibility Signals (Currently Underplayed)

These should be prominent on the site:

Achievement	Current Visibility	Recommendation
UK DfE Computing Curriculum (shaped national policy)	Not mentioned	Hero section
Antigua & Barbuda ICT Policy (government-level work)	Not mentioned	Hero section
IEEE Brain Neuroethics Framework contributor	Not mentioned	Mention in About
IEEE 2089-2021 (Age-Appropriate Digital Services)	Small mention	More prominent
PhD from Cambridge	Implied via link	State explicitly
Senior Lecturer, University of Roehampton	Mentioned briefly	More prominent
Google RISE Award	Mentioned	Keep
Published in IEEE journals	Not mentioned	Add to establish research credibility

Suggested Credibility Bar (Homepage)

Instead of: > "Google RISE Award Recipient | Led by Dr. Genevieve Smith-Nunes | 15+ Years in Computing Education"

Consider: > "Shaped UK's National Computing Curriculum | IEEE Standards Contributor | Cambridge PhD"

Or more conversational: > "Trusted by: UK Department for Education | IEEE | Government of Antigua & Barbuda"

3. Products - Options for Discussion

Current Product Structure

- **Free resources** (3 items)

- **Lesson packs** (£49-79 each)
- **School subscriptions** (£149-249/year)

Proposed: Freemium Model

Option A: Content Tiers | Tier | What's Included | Price | |---|---|---|---|---|---| | Free | Lesson outlines, basic worksheets, "taster" content | £0 | | Educator | Full lesson plans, all resources, assessment materials | £X per pack or subscription | | Institution | Everything + rights to adapt, school-wide license, logo use | £X/year |

Option B: Methodology Packages Rather than selling "lessons," sell complete methodologies:

Package	Description	Includes
Wearables in the Classroom	Complete unit on physical computing with wearables	6-8 lessons, kit lists, assessment rubrics, video guides, troubleshooting
data-driven School Event	Run your own data + dance event	Session plans, timetable, technical guides, performance framework, event checklist
Hackday in a Box	Everything needed to run a school hackday	Planning guide, challenge cards, judging criteria, participant materials, timeline

Option C: Hybrid - Free "taster" content for each methodology - Paid "full package" with everything needed to deliver

Language Options (avoiding "CPD")

Instead of "CPD Resources," consider: - "Educator Resources" - "Teaching Toolkits" - "Classroom-Ready Packages" - "Educator Guides" - "Professional Resources for Educators" - "Ready-to-Teach Packs"

Question for Genevieve: What language feels authentic? What do educators actually search for?

4. Services - Options for Discussion

The Boundary Question

Where does **ReadySaltedCode** (business) end and **Genevieve Smith-Nunes** (academic freelancer) begin?

Activity	ReadySaltedCode?	Genevieve Personal?
Selling lesson resources	Yes	
Training educators on methodology	Yes	
Keynote on computing education	?	?
Curriculum consultancy for schools	Yes	
Government policy work		Yes (academic)
IEEE/standards work		Yes (academic)
High-profile hackday (e.g., UN/Google)	Yes (the brand)	Yes (the expertise)

Recommendation: Speaking/keynotes could sit under ReadySaltedCode when the topic is practical (creative computing, engaging students) and under Genevieve when academic (research, policy, ethics).

Proposed Service Categories

1. Educator Training (Scalable) - Online courses / video training - "How to run a Hackday" methodology - "datadrivendance for your school" certification - Could be self-serve (recorded) or cohort-based (live)

2. Consultancy (High-Value, Limited) - Curriculum review for schools/MATs - Computing department setup/improvement - Bespoke programme design - **Priced to reflect seniority** - this is expert consultancy, not day-rate teaching

3. Flagship Events (Premium, Rare) - Genevieve-led hackdays for major events - UN, Google, national initiatives - Partnership/sponsorship model rather than fee-for-service

4. Speaking (Clarify Ownership) - Option: List on ReadySaltedCode with clear positioning - Option: Keep on personal site, ReadySaltedCode focuses on products/training

Services NOT Offered (Clarifies Positioning)

- In-classroom teaching (Genevieve doesn't come teach your students)
 - Day-to-day workshop delivery (train educators to do this themselves)
 - Low-cost/high-volume work
-

5. datadrivendance - Packaging Options

Current Positioning

"A series of innovative performance pieces" - positions it as Genevieve's art project.

Proposed Repositioning

"A proven methodology for combining data, technology, and creative expression" - positions it as something educators can use.

Package Concept: "datadrivendance for Schools"

What educators get: - Complete session plans (8-12 sessions) - Technical setup guides (what hardware, what software) - Data collection frameworks (ethical, age-appropriate) - Movement/choreography resources (no dance expertise required) - Culminating event guide (how to run the final performance) - Student workbooks - Assessment criteria (links to computing + PE/dance curriculum)

What makes it special: - Cross-curricular (Computing + PE/Dance + Art) - Inclusive (all abilities can participate) - Visible outcome (performance event engages parents/community) - Research-backed (Genevieve's published work)

Pricing model options: - One-time purchase (£199-399?) - License per school (annual?) - "Certified facilitator" training (premium, includes support)

6. Website Structure - Proposed Changes

Current Navigation

Resources | Workshops | Lessons | datadrivendance | Archive | About

Proposed Navigation Options

Option A: Product-Focused

Resources | datadrivendance | Training | About

Option B: Audience-Focused

For Educators | For Schools | datadrivendance | About

Option C: Action-Focused

Browse Resources | Get Trained | Book Consultancy | About

Homepage Sections (Proposed)

1. **Hero:** New positioning statement + key credentials
 2. **What We Offer:** Resources / Training / Consultancy (not "Workshops")
 3. **Featured:** datadrivendance methodology (prominent)
 4. **Credentials:** Expanded "About" with policy work, publications
 5. **Free Resources:** Taster content / lead generation
-

7. Revenue Model - Summary Options

Model	Description	Pros	Cons
Digital Products	Sell lesson packs, methodologies online	Scalable, passive income	Need marketing, platform
Training Courses	Online educator training (self-serve or cohort)	Scalable, higher price point	Requires content creation

Model	Description	Pros	Cons
Consultancy	High-value, limited availability	High revenue per engagement	Not scalable, time-intensive
Licensing	Schools pay annual fee for resources + updates	Recurring revenue	Need enough content to justify
Hybrid	Free content > paid resources > premium training > consultancy	Multiple entry points	Complex to manage

8. Questions for Genevieve

1. **Products:** Which packaging approach feels right - lesson packs, methodology packages, or something else?
2. **Pricing:** What price points feel appropriate for the repositioned offering? Current prices (£49-249) feel "teacher resource" level - should they increase?
3. **Services:** Should speaking/keynotes live on ReadySaltedCode or stay personal? Where's the line?
4. **datadrivendance:** Is she ready to package this as a methodology others can deliver? What would she need to create?
5. **Credentials:** Is she comfortable being more prominent about the policy work? Any sensitivities?
6. **Time:** How much time does she want to spend on ReadySalted-Code vs academic work? This affects what's viable.
7. **Language:** What terms feel authentic? "Educator resources"? "Teaching toolkits"? Something else?
8. **Platform:** Where should digital products live? Own site? Gumroad? Teachable? TES?

9. Immediate Next Steps (If Approved)

1. **Finalise positioning statement** based on discussion
2. **Choose product/service structure**

3. **Update website copy** to reflect new positioning
 4. **Surface credentials** more prominently
 5. **Reframe datadrivendance** as methodology (if agreed)
 6. **Remove/update "Workshops" page** - reframe as training or remove direct booking
 7. **Create one "hero" free resource** as lead magnet
-

10. Stories Archive - The ReadySaltedCode Journey

The Asset

75 blog posts from 2012-2017 documenting: - Project development (RC cars, wearables, hackdays) - Event participation (Maker Faires, festivals, school visits) - datadrivendance evolution ([arra]stre > [data]storm > [pain]Byte) - Industry engagement (Google, Brighton Digital Festival) - The story of how ReadySaltedCode grew

The Problem

Currently hidden as "Archive" - feels like old, irrelevant content. But this is actually **proof of track record** and tells the story of the company's evolution.

Options for Integration

Option A: "Our Journey" Timeline - Curated highlights as a visual timeline - Shows evolution from early projects to current positioning - Demonstrates longevity and experience

Option B: Weave into Relevant Sections - datadrivendance page links to original development posts - Hackday methodology references early hackday stories - Adds depth and credibility to current offerings

Option C: "Case Studies" Reframe - Select best stories, rewrite as case studies - "How we developed the wearables curriculum" - "The story behind datadrivendance"

Option D: Leave Hidden for Now - Content remains at /stories (accessible via direct link) - Focus relaunch on new positioning - Revisit archive integration later

Question for Genevieve

How important is the history to the relaunch narrative? Should we invest time curating it, or focus on new content first?

11. Paid Content - Product Proposals

The Freemium Foundation

Current free resources (6 lesson packs) serve as tasters. Revenue comes from premium content that goes deeper.

Target Markets (Beyond Schools)

Market	Why They'd Buy	What They Need
Schools	Curriculum delivery, enrichment	Curriculum-mapped, assessment-ready
Scout Association / Guides	Badge requirements, programme content	Activity-based, badge-aligned, leader guides
Youth clubs / Coder Dojos	Session content, volunteer support	Drop-in friendly, minimal prep, fun-focused
Corporate CSR / Outreach	Community engagement, STEM pipeline	Turnkey, impressive outcomes, photo-worthy
Museums / Science Centres	Workshop content, holiday programmes	Engaging, hands-on, varying age groups
International schools	Creative computing curriculum	English-language, adaptable

Proposed Paid Products

1. Complete Programme Packs (£149-299) Multi-week structured programmes, not just individual lessons:

Pack	Duration	Includes
Wearables Programme	8 weeks	Full scheme of work, all resources, assessment, video guides, kit list with suppliers
Physical Computing Programme	10 weeks	micro:bit/Pi pathway, progressive projects, differentiation
Creative Coding Programme	6 weeks	Scratch to Python bridge, creative outcomes

2. Event-in-a-Box Kits (£199-399) Everything needed to run a specific event:

Kit	What's Included
Hackday in a Box	Planning timeline, challenge cards, team materials, judging rubrics, certificates, facilitator guide, promotional templates
datadrivendance Event Kit	8-12 session plans, technical setup, movement resources, performance framework, parent comms templates
Maker Fair Stand Kit	Activity stations, signage templates, volunteer briefings, engagement tracking

3. Organisation-Specific Packs (£99-199)

Pack	Audience	Alignment
Scout Digital Maker Pack	Scout leaders	Digital Maker badge stages 1-4
Guide Tech Pack	Guide leaders	Skills builder framework
Coder Dojo Session Pack	Dojo volunteers	12 drop-in sessions, varying difficulty
Holiday Club Pack	Holiday programme providers	5-day themed programme

4. Corporate Outreach Package (£499-999) For companies running STEM outreach: - Turnkey 1-day or multi-session programme - Branding templates (add company logo) - Volunteer briefing and

training guide - Impact measurement framework - Photo/video release templates - "Powered by ReadySaltedCode" attribution

5. Subscription / Membership (£199-499/year) For organisations wanting ongoing access: - All programme packs - New content as released - Quarterly Q&A calls - Resource request submissions - Community forum access

Content Creation Priority

What needs to be created vs. what exists:

Product	Exists?	Work Needed
Lesson content	Yes (free)	Package into programmes, add video
Hackday framework	Partial	Document methodology, create materials
datadrivendance kit	No	Major creation project
Scout/Guide alignment	No	Map existing content to badge requirements
Corporate package	No	Create wrapper, templates, branding guides

Pricing Strategy

Tier	Price Point	Target
Individual educator	£49-99	Teachers buying personally
School/organisation	£149-299	Department budget
Multi-site license	£499-999	MATs, Scout districts, corporate
Enterprise/bespoke	£1000+	Large corporates, national programmes

12. Questions for Genevieve (Additional)

9. **Archive:** How important is telling the RSC story? Invest time now or later?
10. **Markets:** Which non-school markets are most interesting? Scouts? Corporate? International?
11. **Content creation:** What's realistic to create? What exists that could be packaged?

12. **Pricing:** Do these price points feel right for the repositioned brand?
 13. **Partnerships:** Interest in licensing to organisations (e.g., Scout Association) vs. direct sales?
-

Appendix: Genevieve's Key Credentials (for reference)

Education

- PhD in Education, University of Cambridge (2019-2023)
- MA Research Methods, University of Roehampton
- PGCE Secondary Computing, University of Brighton

Current Roles

- Senior Lecturer, University of Roehampton (2017-Present)
- Visiting Lecturer, King's College London (2020-2024)

Policy & Standards

- UK Department for Education - Computing Programme of Study working group (2012-2014)
- Antigua & Barbuda Government - ICT Education Policy (2022-2025)
- IEEE Brain Neuroethics Framework 2025 - Education component
- IEEE 2089-2021 - Age-Appropriate Digital Services for Young People

Awards & Funding

- Google RISE Award for Computer Science Education (2014)
- XR Innovation Award, ILRN (2022)
- Multiple Arts Council England grants
- Internet Society Foundation funding (Antigua research)

Publications

- IEEE Technology and Society Magazine
- IEEE Consumer Electronics Magazine
- Social Media + Society
- IEEE Brain Neuroethics 2025

Document prepared for client discussion - January 2026
